

APOLLO LAUNCHER

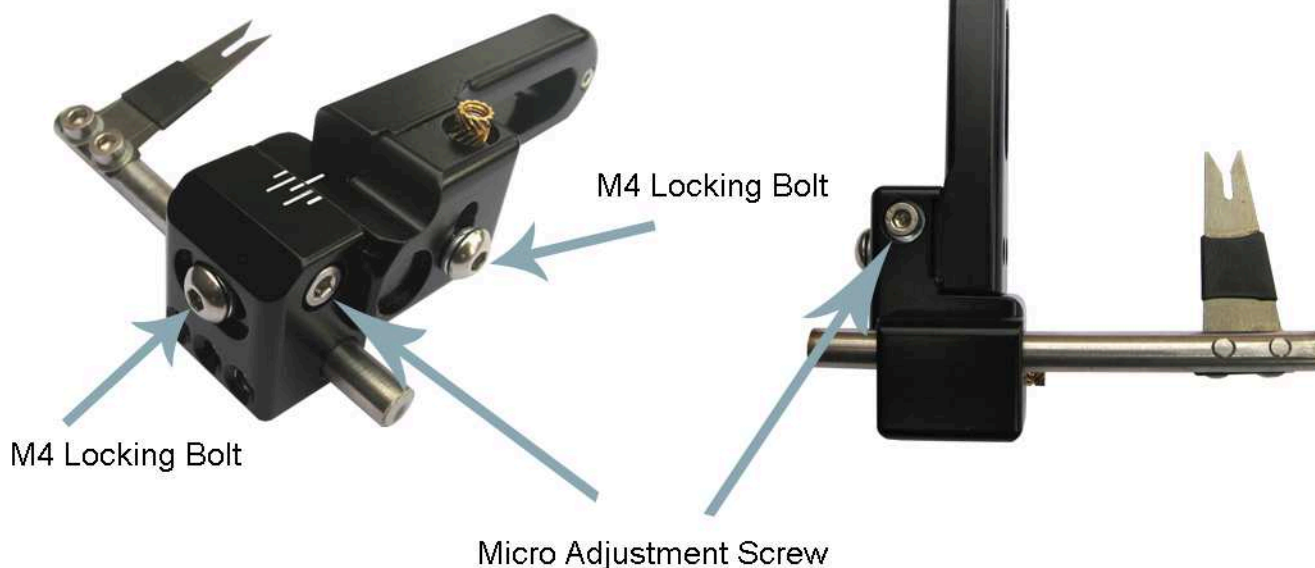

BLADE SELECTION AND ANGLE

Your arrow rest has the option of 4 blade thicknesses. The choice of thickness depends on arrow weight and arm angle. The flatter the arm angle, the softer the blade reacts. Below is a guideline for weight selection.

0.008" total arrow weight under 325g
0.010" total arrow weight 325g-425g
0.012" total arrow weight over 425g
0.014" total arrow weight over 500g

MICRO ADJUSTMENTS

By relaxing the M4 locking bolts, you can use an allen key to turn the Micro Adjustment screws and change horizontal and vertical alignment.
